KingAsterisk Technologies Providing

Web Development

Software Development, Server Management, Network Management, Configure DHCP for Windows & linux networks. Dialer Technical Support with VoIP Server Technical Support, VoIP Minutes Re seller with dialer.

VOIP

Voice over Internet Protocol is a category of hardware and software that enables people to use the Internet as the transmission medium for telephone calls by sending voice data in packets using IP rather than by traditional circuit.

Technology Plan

Information technology infrastructure strategies include operations, modifications, augmentation, and replacement computer and communications equipment, telephone, network facilities, and system software.

Linux

Linux, which began its existence as a server OS and Has become useful as a desktop OS, can also be used on all of these devices. The operating system (OS) relays instructions from an application to, for instance, the computer's processor.

Facilitate Best Solutions

Asterisk empowers developers and integrators to create advanced communication solutions. An Asterisk system is a low cost type of a traditional pbx system. Asterisk pbx supports a wide range of TDM protocols for the handling and transmission of voice over traditional telephony interfaces, and VoIP packet protocols

Benefit From VoIP Telephony

Reduced calling costs and completely free when they travel over data network.

Integrated voice and data applications

Gain central control of remote branch telephone calls.

Deploy company-wide dial-plans and short codes for simplified network operations.

Connect Home users into the central PABX (Private Automatic Branch exchange) as though in the office with no call charges.

Permits call to all standard telephones too, and not just other VoIP users.

Asterisk Solutions

We are very innovative with opensource voip technology based product and marvelous applications.

We are working on voip based opensource plateform since 10 years, we are providing our solutions, services and supports on several applications like asterisk, freepbx, a2billing, dialer, freeswitch, opensips ,kamailio, callweaver, hylafax, elastix, EPABX, IVR, Predictive dialers, Voice Mail, Voice Logger, Video & audio conferencing solutions, web conferencing solutions and lots more.
